Sea Change combine their love of great wine with their desire to do something to help protect our oceans. Turning the tide on the juggernaut that is plastic pollution is only going to happen if we all make changes, even small ones, and this is where the wine you choose can help play a role. With the removal of the unnecessary plastic wrap around the cork, the use of renewable plant-based closures and the paper for the labels coming from certified sustainable forests and made partially from grape waste, combined with a donation to marine charities from every bottle sold, choosing Sea Change does make a difference. Join us to help turn the tide on plastic pollution and the harmful effects it has on our oceans and the amazing wildlife that live in them.
